Make it easy on yourself

How would you rather spend your time: trying to manage Web tools that never quite work together the way you want, or designing high-impact, compelling Web sites with some of the industry's leading solutions?

The answer is easy: with this special offer from NetObjects and Compaq, you get a fully integrated set of top-quality products at surprisingly low prices.

Make it simple—with the leading Web site design software

Award-winning NetObjects Fusion software gives you incredible control to design, build, and update your Web site. Its unique, site-wide approach lets you set the structure right from the start and maintain the site easily as it grows. Add Adobe Photoshop for creating and compositing captivating images, and Adobe Illustrator for graphics and illustration, and you have the world's gold standards for Web site software.

Make it snappy—with the top-flight performance of Compaq

The Compaq Professional Workstations 5000 and 5100 provide a firm foundation with virtually everything you need for brilliant Web site design: power, standards, reliability, and service from an undisputed industry leader.

Make it affordable—with a professional Web Site Solution package

These solutions give you a choice of high-powered, economical workstations and industry-leading design software at significant savings. Simply put—they're the best performance value around.

Make it happen today!

These Web Site Solution packages are currently available through Ingram Micro and its Compaq Authorized Resellers. To find your nearest authorized reseller of Compaq products, call **1-800-345-1518**.

For more details on Web Site Solutions from Compaq, visit www.compaq.com/products/workstations

All prices are estimated street prices only. Actual prices through participating resellers may vary. Solution prices include prices for full versions of the software. Pricing for competitive upgrades or version upgrades can be obtained through your nearest reseller.
